API GATEWAY ABSTRACTION OBJECTS

DATABASE	LOGIC	GATEWAY	INTERFACE

DOMAIN-PATH-PATHGROUP

The API Gateway abstraction object allows the setup of routes that describe what functionality is exposed via a specific path as well as the access control rules of who is allowed to access a certain route

API GATEWAY ABSTRACTION OBJECTS

DATABASE	LOGIC	**GATEWAY**	INTERFACE

AUTHN-AUTHZ

The authentication and access control abstraction objects enables the authentication of users of the applications created on the platform as well as setting up of access control rules of what a user is and not allowed.
