# BASEJMP ALTERNATIVES

SAAS

BUY OFF-THE-SHELF

One alternative to the Basejmp platform is the purchase of off-the-shelf SAAS applications - while having it's advantages, SAAS does bring in disadvantages as well

DEV

CUSTOM DEVELOPMENT

Another alternative is the custom development of applications either by in-house engineering teams or out-sourced software development agencies.

SAAS-CUSTOM DEV DISADVANTAGES

OFF-THE-SHELF SAAS APPLICATIONS

What are the limitations of using commercial off-the-shelf SAAS applications that meeds your application needs.

✕ **(In) Flexibility**
SAAS applications are common for all of the vendors customers customising the solution to a specific need is not possible

✕ **Data silos**
Each SAAS application used is a Data Silo. Special effort needed to aggregate data across silos.

✕ **Integration Challenges**
Dependent on SAAS vendor if one system needs to be integrated with another system (SAAS or in-house)

SAAS

CUSTOM DEVELOPED APPLICATIONS

What are the limitations of developing a custom application either by in-house development teams or dev agencies.

✕ **High Development Cost**
The cost of full-stack development is very high due to the complex nature of the activity needing scarce talent

✕ **Long development time-lines**
Complex development activity results in long time-lines from conception to deployment

✕ **High TCO**
Even after completion of development, long-term investment needed to enhance and address issues
