# BASEJMP USE-CASES

PARTNER PORTAL

Streamline interactions with business partners by developing use-case specific portals that automate partner interactions.

DIGITAL END-USER EXPERIENCE

Digitise the customer touch-points, either a purchase end-point or a service endpoint with custom applications

APPLICATION MODERNISATION

Replace legacy IT systems by developing new applications with a modern user experience

BASEJMP FOR TECH COMPANIES

Companies with a technology product or service

INNOVATE
RAPID INNOVATION

Extend your product or service with Basejmp and add new features and capabilities to your offering more rapidly and efficiently.

UNLOCK
UNLOCK POTENTIAL

Enter new markets or address new needs of your existing customer-base by developing new products and providing new services that was not possible previously due to budget and resource constraints
